OUTCOMES: SOVEREIGN ANALYSIS

Structural Soundness

Infinite resources. Structurally trapped.

- Reliant on bloated, multi-layer infrastructure.
- Crippled by per-inference cloud taxation.
- Requires high-friction pricing to survive.

Sovereign architecture. Wildly efficient.

- Built by one founder, 13+ shipped products.
- Entire tech stack owned end-to-end.
- Zero per-inference cloud tax.

This structural moat is exactly why you get Bloomberg-grade analysis for under $100/year.
End-to-end sovereign control.

CLOUD AI WRAPPERS CAN COPY THE ATTITUDE. THEY CANNOT COPY THE ARCHITECTURE.

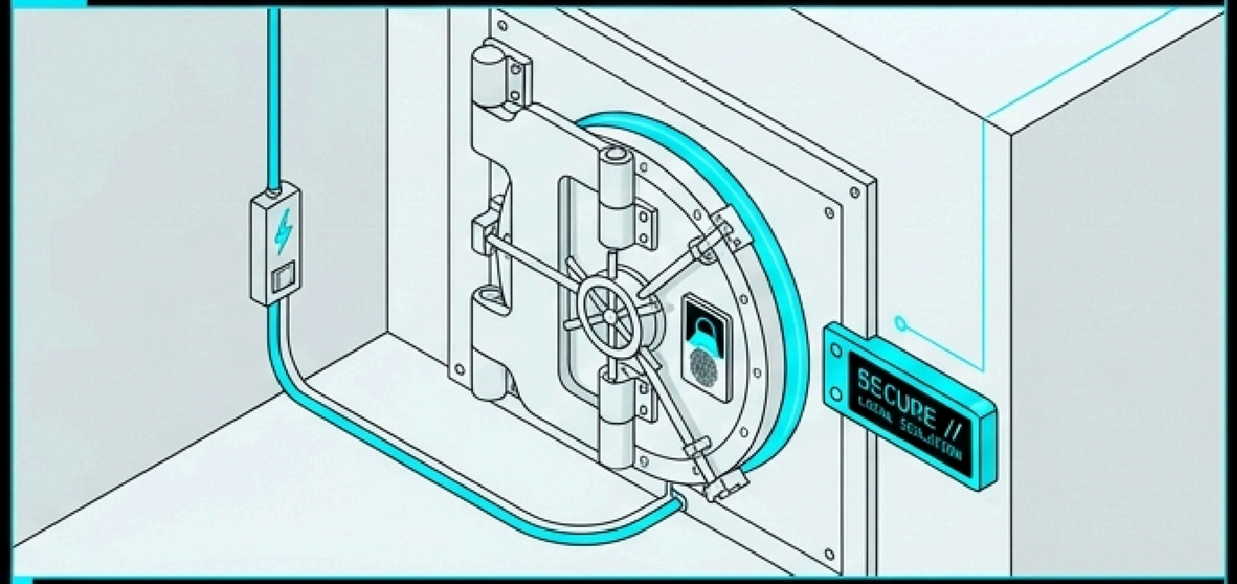
Everyone can read your notes.
Your investment edge becomes their training data.

B The Bank Vault (Outcomes Sovereign Local AI)



The door locks from the inside.
Zero customer thesis content ever touches a cloud server.

Cloud competitors paying $0.01-$0.05 per inference call would go bankrupt trying to match this for 5,000-run Mo

ACQUISITION PROTOCOL: 12-MONTH FOUNDER COHORT

We show you exactly how many seats remain because we hide nothing—same principle as our published math.
